

gahan is a white beet new to the UK market. The variety is characterised by clean well-shaped low dirt tare roots and good storage characteristics. gahan is suitable for use in the animal feed market due to its very high dry matter yields.

Key Strengths

- Very high dry matter yields
- Good storage characteristics
- High quality seed for good results
- Had the highest dry matter yield in the Danish National List trials in 2018
- Clean well-shaped low dirt tare roots for easier harvesting
