

Sugar beet

# Button

Z-Type

button offers good yields, a high level of tolerance to Rhizomania. It offers very low bolting so is suitable for early drilling, it has the early sown lowest bolting figures of all BCN tolerant varieties and the second lowest figure of all RL varieties, it also has zero (0) bolters/ha for normal sowing.

Key Strengths

- High performance under BCN pressure
- Suitable for early sowing
- Excellent establishment
- Low total impurities
- Very Low Bolting
- Suitable for early drilling

Plant Characteristics

Resistances / Tolerances	Resistance - Rizomania
Type	Z
Sugar Yield	high
Particularity	High performance under BCN pressure Suitable for early sowing Excellent establishment Low total impurities
Year of registration	0

Date of harvest
