

Plant Breeder Strube now 100% daughter of Deleplanque Group

Deleplanque announced today that it has reached an agreement with SUET to acquire 100% of Strube. This transaction will be completed by the second half of 2024 at the latest. Since 2018, SUET, a pelleting specialist, had been 40% shareholder of Strube D&S.

At the same time, Deleplanque announces the sale of its historic ferti-liser business to Sani, part of Veolia Agriculture France, with effect from 6th May 2024.

“These two joint operations will enable the Deleplanque Group to de-velop stronger synergies between the entities that make up its Group: Deleplanque, Van Waveren and Strube, in order to strengthen our plant breeding activities”, explains Eric Verjux, Chairman of the Dele-planque Group.

Deleplanque is reinforcing its position as a leading international player in the sugar beet seed, vegetable seed (peas, beans, sweetcorn) and field seed (primarily wheat and sunflower) markets.

“This strategic move will reinforce our development objectives, particu-larly in the sugar beet seed market,” says Hervé Caroff, General Man-ager of Strube.

Hervé Caroff, Gen-eral Manager, and Dr Mi-chael Stange, Head of Sugar Beet Breeding and Product Management, embrace the strategic move made by Deleplanque.
